

NOT ALL FOGGERS ARE CREATED EQUAL

This uniquely designed twin nozzle, electric powered unit will treat areas up to 300,000ft³. The **E-IV** includes its own wall mounting brackets and features dual nozzles which can be individually adjusted for directional spray with a choice of chemical flow rates ranging from 1.5 to 5 OPM (44-148 ml/min).

E-IV options include separate wall brackets to hold either a 2.5 or 5 gallon (18 litre) jug/pail, automatic timer and handcart (includes automatic timer).

Whether treating an open or divided area prescribed amounts of chemical per area can be determined by the timer controls and or selected chemical flow rates.

**THE MOST VERSATILE INSECTICIDE DISPERSAL SYSTEM
ENGINEERED FOR LARGE TREATMENT AREAS.**

Fully Portable

The optional hand cart transforms the **E-IV** to a mobile chemical dispersal unit. The powder coated cart was designed with total portability in mind - it includes a space to hold up to a 5 gallon chemical container, a securing strap, a mounted 24 hour timer with protective cover and a cable wrap for extension cord storage.

Handcart Specifications

Length 24"60.96cm
 Width 19"48.26cm
 Height 44"111.76cm
 Weight 38 lbs....17.69kg

Recommended Uses

Food Processing Plants
 Storage Warehouses
 Distribution Centers
 Restaurants
 Supermarkets
 Dairies
 Flour Mills, etc.
